PROFESSIONAL SUMMARY

Computer Science graduate (Cum Laude) from Sam Ratulangi University with expertise in Data Analytics, Data Science, Machine Learning, Deep Learning, Natural Language Processing (NLP), and Business Intelligence. Experienced in dashboard development, sentiment analysis, computer vision research, and AI-powered solutions that transform data into actionable business insights. Additionally, I manage a hydroponic lettuce farming business focusing on cultivation optimization and data-driven agricultural practices.

EDUCATION

Sam Ratulangi University

Bachelor of Computer Science (Informatics Engineering)
GPA: 3.85/4.00 (Cum Laude) | Graduated: July 2025

WORK EXPERIENCE

Data and Information Management Intern – BKN Manado (Dec 2025 – Jun 2026)

- Managed data cleansing, validation, and maintenance of ASN datasets.
- Developed interactive dashboards and AI-generated summaries to support decision-making processes.
- Assisted in transforming administrative data into actionable insights through visualization and reporting.

Research Community Member – AI-VISION (Dec 2024 – Sep 2025)

- Conducted Artificial Intelligence and Computer Vision research projects.
- Developed and evaluated deep learning-based face detection models.
- Participated in model benchmarking, experimentation, and performance optimization.

Backend Developer Intern – Asitech Global Solution (Oct 2023 – Jan 2024)

- Developed backend services using NestJS and relational databases.
- Designed and optimized database schemas to improve system performance.
- Implemented RESTful APIs and maintained data integrity.

PROJECTS

YOLO11n-GConvMod: Lightweight Face Detection Model

- Enhanced YOLO11n by replacing attention modules with GConvMod inspired by Conv2Former.
- Improved detection performance while reducing computational cost.

Sales Performance Analytics Dashboard for Sugar Products

- Performed Root Cause Analysis (RCA) and Year-over-Year (YoY) analysis using the US Candy Distributor dataset.
- Developed dashboards and recommendations to improve sales performance.

Customer Review Sentiment Analysis for Pegadaian Digital App

- Collected and analyzed 1,500 customer reviews from the Pegadaian Digital application using Google Play Scraper.

- Developed a Deep Learning sentiment analysis model using Bidirectional LSTM (BiLSTM) and TensorFlow.
- Performed text preprocessing, tokenization, sequence padding, and sentiment classification.
- Categorized customer feedback into Application Bugs & UI, Customer Service, Gold Investment & Pawn Services, Administrative Fees, and Product Features.
- Generated dashboard-ready datasets and actionable insights for product enhancement.

Hydroponic Lettuce Farming & Smart Agriculture Project

- Manage a hydroponic lettuce farming.
- Monitor crop growth, nutrient conditions, and environmental factors to optimize production. improvement.

CERTIFICATIONS

- RevoU Data Analytics & Generative AI
- Data Science Challenge with Python – DQLab
- Big Data Using Python – Digital Talent Scholarship (Kominfo)

TECHNICAL SKILLS

Python, SQL, TensorFlow, Scikit-learn, Pandas, NumPy, Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Data Analytics, Data Visualization, Power BI, Tableau, Streamlit, Excel, PostgreSQL, MySQL, Git, GitHub, Jupyter Notebook, Google Colab

SOFT SKILLS

Analytical Thinking • Problem Solving • Communication • Research • Team Collaboration • Adaptability • Creativity
